

LUMBANI KANOCK

Civil & Structural Engineer

📍 Blantyre, Malawi

☎ +265 888 295 519

✉ likanock@gmail.com

PROFESSIONAL SUMMARY

Civil and Structural Engineer with over 7 years of progressive experience in managing infrastructure projects from planning and design through procurement, construction supervision, quality assurance, and project completion. Experience in delivering multi-sector infrastructure projects while ensuring compliance with engineering standards, contract requirements, budgets, schedules, and quality objectives. Strong expertise in structural engineering.

EDUCATION

Master of Science in Infrastructure Development and Management

Malawi University of Business and Applied Sciences (2026)

- Graduated

Bachelor of Civil Engineering (Structures) – Honours

The University of Malawi, The Polytechnic (2020)

- Graduated with Second Class
-

PROFESSIONAL EXPERIENCE

1. Construction Engineer

Malawi Red Cross Society: Nov 2023 – Present

- Lead planning and implementation of infrastructure projects from project initiation to commissioning, ensuring delivery within approved scope, budget, schedule and quality requirements.
- Coordinate preparation of designs, bills of quantities, technical specifications, tender documents, and procurement inputs for construction work.
- Provide technical leadership during construction through regular site inspections, quality control assurance reviews, contractor meetings, and progress monitoring.
- Manage contractor performance by reviewing work programmes, evaluating progress, and resolving technical challenges.
- Review interim payment certificates, assess variation orders, verify completed quantities, and recommend payments.
- Coordinate project implementation with consultants, government authorities, contractors, suppliers, and local communities.
- Identify construction risks and implement corrective measures to minimise delays and maintain project quality.
- Prepare technical reports, management updates, and construction progress reports for senior management and development partners.

- Ensure compliance with occupational health and safety standards, engineering specifications and donor requirements.

2. Structural Engineer

PILY Engineering Services: Jul 2020 – Oct 2023

- Designed reinforced concrete, steel masonry and timber structures for residential, commercial, institutional, and educational structures.
- Prepared structural calculations, reinforcement schedules, and detailed construction drawings.
- Conducted structural inspections and provided technical guidance during construction, ensuring compliance with approved designs.
- Collaborated with architects, quantity surveyors, contractors and clients to optimise project delivery and resolve construction challenges.
- Assisted in contract administration, preparation of progress reports, and evaluation of contractor claims under FIDIC conditions of contract.

3. Site Engineer (Independent Consultancy)

USAID / Chemonics International: Mar 2023 – Sep 2023

- Managed rehabilitation and maintenance activities for pharmaceutical storage facilities across multiple districts under a USAID-funded programme.
- Conducted facility condition assessments and prepared bill of quantities, technical specifications, and cost estimates for maintenance works.
- Supervised contractors during implementation, ensuring compliance with approved specifications, project schedules, and quality standards.
- Inspected drug storage facilities and prepared Bill of Quantities on maintenance needs.
- Ensure maintenance is carried out according to specifications.
- Reviewed completed works, monitored project expenditures, assessed variation orders, and verified contractor claims.
- Prepared technical monitoring reports identifying implementation risks and recommending corrective actions.
- Coordinated project implementation with district authorities, contractor, consultants, and donor representatives.

4. Projects & Maintenance Engineer (Independent Consultancy)

Blantyre Synod Education Department: Jan 2022 – Feb 2023

- Managed construction of modern accessible school blocks, labs, and staff houses in Community Day Secondary Schools in Zomba, Ntcheu, Blantyre and Balaka Districts in Malawi.
- Prepared construction proposals and narratives for donor consideration.
- Prepared and reviewed standard drawings for construction projects.

- Monitoring construction projects for compliance with standards and specifications.
- Prepared project monitoring reports to management and project funders.
- Prepare method statements on maintaining existing infrastructure.

5. RM Enterprise (January 2019 – December 2019)

Intern Structural Engineer

- Analysis and design of structural elements of buildings (concrete, steel, timber).
- Preparing drawings and bending schedules from designs to be used for construction.
- Supervision of civil/structural work to confirm compliance to standards of workmanship.
- Inspect and verify the quality of materials used for construction as quality control and assurance.

6. Chiradzulu District Council- Irrigation Department (July 2018 – December 2018)

Intern Site Engineer

- Plan weekly site activities and prepare weekly reports.
- Conduct setting out of Irrigation Infrastructure, such as weirs and conveyance systems.
- Supervision of the construction of reinforced concrete and stone masonry weirs.
- Supervise artisans in the construction of stone masonry and PVC pipe conveyance systems.

COMPUTER SKILLS

- Microsoft Project, AutoCAD, Prokon, Staad Pro, Robot structural analysis, sketch up, Computer programming
-
